FOR LADIES WANTING THE PERFECT BREASTS, IS ROUND OR TEAR DROP IMPLANTS BETTER?

Get the correct facts from the experts at [Cosmetic Holidays International](#) together with our top, internationally accredited and US Board Certified Plastic & Reconstructive Surgeons and our Head of Aesthetics.

ROUND OR TEAR DROP IMPLANTS?

For ladies wanting the perfect breasts for the body that fulfils your expectations, but with so much information out it gets overwhelming with everybody having an opinion, ladies own experience with their breast surgery to a wealth of confusing and conflicting information about which implants are best.

We recommend you be aware of this and get your information from reputable quality sources. We at Cosmetic Holidays International use Mentor Worldwide LLC for our implants- the U.S. market leader in breast aesthetics.

TEAR DROP IMPLANTS

On the 14 June this year was FDA (US Food and Drug Administration (FDA) has approved MENTOR® tear drop implants that provides new options for women looking for a more natural shape , youthful feel from breast enhancement or reconstruction surgery.

WHY? Because Cosmetic Holidays International together with MENTOR as the world leaders, we understand that every woman has different needs and personal reasons for choosing to undergo breast surgery. By now introducing tear drop implants this allows us to meet our clients wishes and expectations by delivering the perfect balance of shape and feel to obtain the natural and youthful look some of our clients desire.

Dr Witton, Head of Aesthetics at Bangkok Hospital Phuket says "The teardrop implants give a nicer upper pole slope, and it should be inserted from under-breast crease incision. The reason for not inserting through armpits because it's hard to adjust the orientation of teardrop implants from armpit."

For those who would like ROUND IMPLANTS or these are recommended by our surgeons to achieve the best results, they are absolutely wonderful too and a very popular choice. Dr Witton also says that if you are a candidate we recommend an Endoscopic breast augmentation which will hide scars high up in armpits, assisted by the latest technology worldwide using an endoscope."

For everything you need to know, Claire our Managing Director together with Dr Piyapas, one of our top surgeons have written this article that si published on our Blog Spot:
